

Work Station Assessments - COVID-19 Update

Due to the recent outbreak of the COVID-19 virus, we will be offering Virtual Assessments, alongside our usual Work Station Assessments, facilitated using either SKYPE or ZOOM.

Virtual Work Station Assessments will include; an in depth conversation about the subject's condition, as well as their specific workplace difficulties. We will discuss their regular working routine, plus the role they perform within the workplace.

Via video link, observations and discussions will take place regarding the subject's work station and their working environment. It's important to note that this will require measurements to be taken by the subject, of their own work station.

Once these observations are complete, advice will be offered regarding improvements to the work station, management of the subject's condition, and their regular working routine. Furthermore, equipment recommendations will be made, and a full report will be submitted as usual.

Each assessment will last approximately 30 minutes.

If you wish to book a Virtual Work Station Assessment, or have any questions regarding the changes, please don't hesitate to contact us at:
